FREE TO ALL . . .

The World's Fair Prize Collection for 1893

TO those whose orders amount to \$1.50 or more with remittance, we will forward **THE WORLD'S FAIR PRIZE** collection, containing five (5) packets of the **MOST DISTINCT** and **IMPROVED VARIETIES** of Seed which have been established and have become fixed in character by long and careful selection. They are not for sale, and cannot be had from any other seed house or grower, as we control the entire stock. We wish them thoroughly tested all over the land, and decided upon this method of distribution among all who favor us with an order amounting at least to \$1.50 or over. People who do not want that amount each season would not likely be interested in these new and improved sorts. We have omitted to name the kinds, as we wish to surprise all who get them. They will be offered for sale in our next year's Catalogue at from 10 to 15 cents per packet each, and those who once test them will plant no others in future. Each has produced extra results for us—why not for you, when they are free?

1892 WORLD'S FAIR PRIZE COLLECTION.

Last season's World's Fair Prize Collection contained one packet each of the following extra choice varieties, which we offer for sale this season for the first time: 65—N. Y. Improved Rust-Proof Butter Bean, 15c.; 215—N. Y. Heavy-Weight Prize Cabbage, 15c.; 395—N. Y. Family Sugar Corn, 10c.; 895—N. Y. Mam. Sweet Marrow Peas, 15c.; 1045—N. Y. Scarlet Monthly White Tip Radish, 10c. They gave universal satisfaction, and as many have evinced a wish to get all of them again, we make a special offer of the five packets for 35c. prepaid; or for 50c. we will add the two superb new cabbages, No. 207, Improved Large Early Royal, 15c., and No. 211, N. Y. Improved All-Head, 10c., and if you add \$1.00 worth more to your order, we will send you the 1893 World's Fair Prize Collection.

THE BEST STRAINS OF TESTED SEED are often worth more for practical gardening and money-making than the highly illustrated and over-exaggerated

NOVELTIES offered at exorbitant prices. It will be seen, however, by consulting the following pages, that we offer nearly all the latest Novelties at very much reduced prices. They were all grown direct from the introducers' seed stock, and therefore can be relied upon as being genuine. We always advise caution in planting new kinds largely before having tested them. No practical Market Gardener will risk his whole crop of a new or untried variety. But to facilitate the test of the latest Novelties offered, however, we have arranged the **COLUMBIAN NOVELTY COLLECTION**, containing 25 of the latest, and what purports to be the Best Novelties introduced by the Various Seedmen; for description of the kinds it contains see the last cover page. Price \$1.00 postpaid. The same selected from the introducers' catalogues will cost over \$3.00 besides having to write some half a dozen letters.

CLUB ORDERS. By a little effort you can get up a club order among your friends and neighbors, and make the old Storekeeper's Profit of one-half. Besides, **THE OLD STORE** seeds generally prove worthless, then why not order from headquarters—the growers?

FREE TRIAL PACKET.

We want our seeds planted by everyone receiving this Catalogue, whether they send us an order or not, and hence this season have decided to send with it, **FREE**, a rare novelty never before offered. Every person knows the beauty of the Passion Flower, which could only be grown to perfection in a conservatory, but with this new hardy variety everyone can have mammoth blue Passion Flower blossoms growing over windows or on trellises with no more attention than Clematis or Wistaria, by giving the plants some protection of leaves or straw during the winter at the north. Be sure and plant this rare novelty.

POSTAGE.—Seeds in packets and ounces will be prepaid to any Post-office. If larger quantities are to be sent by mail, add to order for postage at the rate of 8c. per lb. and 15c. per qt. on Beans, Peas, and Field Corn, and 10c. per qt. for Sweet Corn. At prices named, seeds by the pound, quart, peck, and bushel will be shipped by express, freight, or steamer, charges to be paid by party receiving the same. Send shipping instructions with each order.

NO CHARGE is made for boxes or barrels, and all seeds are delivered free of cartage to transportation company.

QUANTITIES.—One-quarter pound at pound prices; pecks or one-quarter bushel at bushel prices.

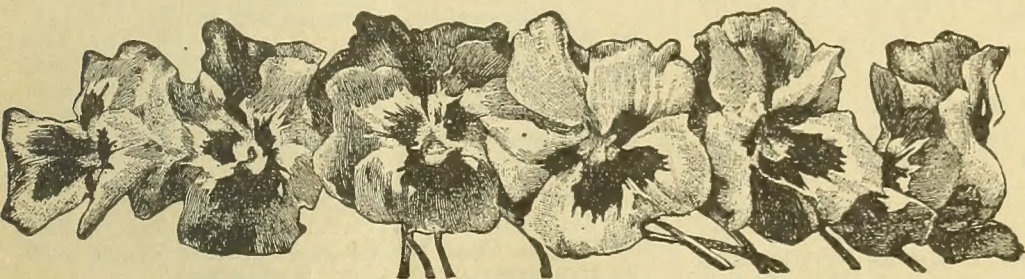

TERMS.—As we have listed everything at "HALF PRICE," our terms are Net Cash with order. Our Introduction Collection is the only exception to this rule.

As anything ordered from this Catalogue can not be returned, there remains no reason why the exact amount should not accompany each order. In the busy season we cannot take time to make out bills for small amounts and open little accounts. On all orders amounting to \$25.00 or over from responsible parties who desire credit, we will accept bank notes with interest added, payable at local bank, July 1, 1893. Parties unknown to us will please send satisfactory reference with order.

HOW TO SEND MONEY.—Remittance should be made by New York Bank Draft, Post-office Money Order, Express Money Order, or Registered Letter, at our risk. Postage stamps, when clean and free from moisture, will be taken in small amounts, and postal notes are convenient for small sums, but are not safe, for, if lost, cannot be duplicated. Both of the last two ways will be at the risk of sender.

CATALOGUE NUMBERS.—For brevity and the convenience of our correspondents we have prefixed a catalogue number to each variety of seeds, which can be used when ordering or referring to any kind.

PREMIUMS.—To all whose order with remittance amounts to \$1.50 or over, THE WORLD'S FAIR PRIZE COLLECTION for 1893 goes free as offered on first inside cover page. It is a great surprise to all who get it. The kinds can not be had elsewhere.

GRAND PANSY HEADQUARTERS.

We are headquarters for Pansy Seed, and annually supply many hundred Florists. We make some rare offers in Pansy Seed. See pages 19 and 22.

THE MATTER OF QUALITY.

Extreme earliness, evenness in maturity and uniform good type are only produced by seeds grown with care from selections, and in a proper climate. These special qualities in the resultant crops can only be secured from seeds of the highest character. No matter what the cultivation, it cannot prevent poor seed from producing an unsalable crop. The skilled gardener, therefore, wants seeds of the best selected quality, no matter what they cost. These facts, and the frequent failure to buy seeds of the proper quality from the seed stores, causes many gardeners who grow for the critical trade, and where competition is so strong, to raise their own seeds, though at a much greater cost than what they could be purchased at. The item of seed from which to grow a crop for market is very small compared to the outlay for fertilizers, high cultivation, skilled labor, and rent of land. In many cases the cost of seeds is less than one fiftieth part of the expense of producing the crop; that is, to every dollar expended in seeds, over forty-nine dollars are spent in manure, labor, rent, etc. There being very little difference, if any, in the cost of growing a first-class crop instead of a poor one, it would, therefore, seem imperative to plant only the choicest. The seeds offered in following pages being all grown by practical market gardeners, and of the same quality as planted around the metropolis, the quality is assured. By reason of supplying them direct from the grower to the planter, the great expenses of a city store and expensive catalogues, besides the middleman's profit, are saved, enabling us to supply the best at half the usual price of ordinary store seeds.

We offer only the best strains of Cabbage Seed grown in the vicinity of New York, where the stocks are given the closest attention. Low grades of American-grown seeds, also imported Cabbage Seed could be supplied much cheaper, but from long experience there are too many chances of losing the crop. Beware of imported or cheap cabbage seeds. They often produce "nothing but leaves."

THREE GRAND CABBAGES * FOR MARKET GARDENERS = = = = AND TRUCKERS.

No. 215.—N. Y. Heavy Weight Prize Cabbage.
Packet, 15c.; oz., 50c.; lb., \$6.00.

**No. 211.—N. Y. Improved All Head Cabbage. Worm Proof. Packet, 10c.;
oz., 30c.; lb., \$3.50.**

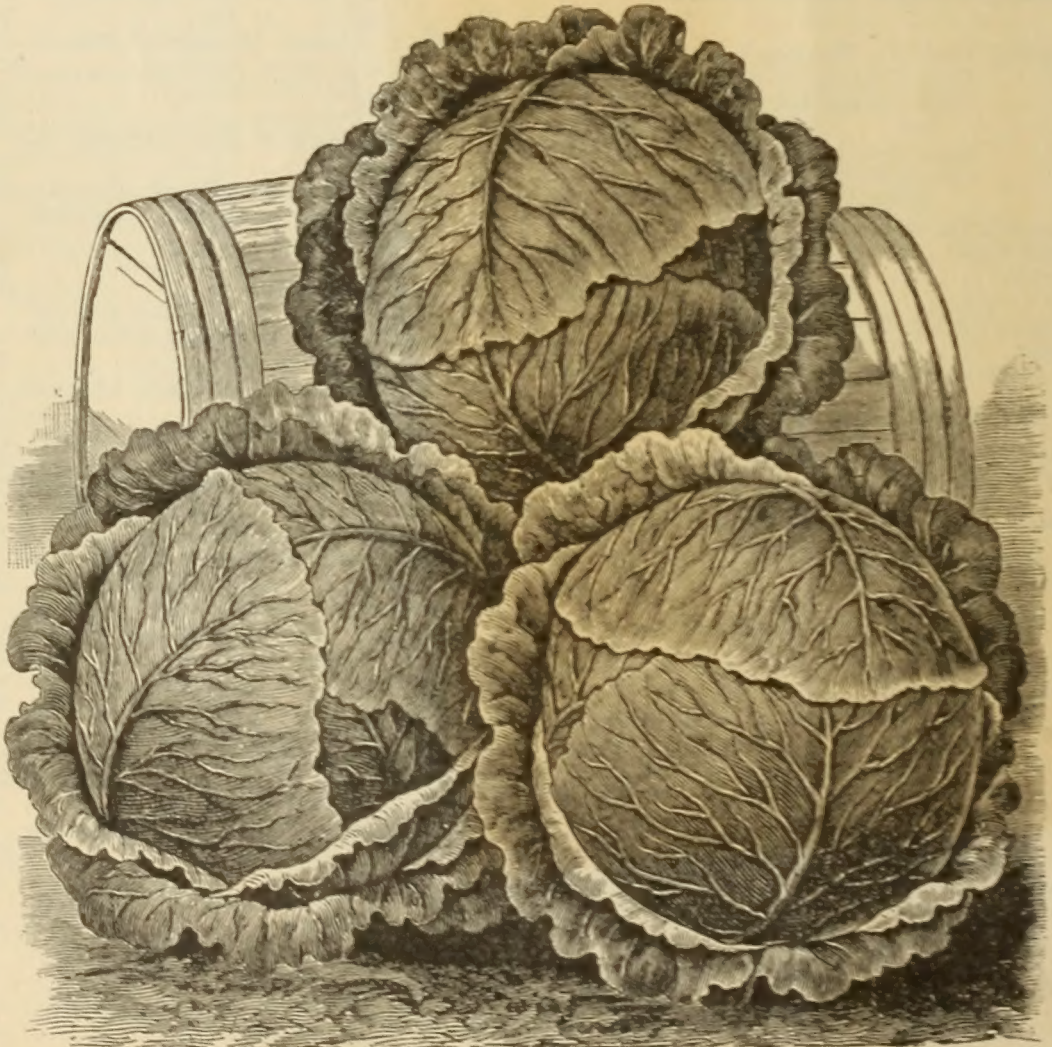

It is a well-known fact that the best cabbage brought to N. Y. markets is grown by growers of long experience, who have made it a study for years, raising their own seed, which they will not part with for less than \$20.00 per lb. It is a mistake practiced by seedsmen to secure a little of such choice seed and place it in the hands of the cabbage seed growers. As they study how to produce the greatest number of lbs. per acre and cannot risk grow-

ing from the largest selected hard heads, as they are difficult to keep over, and, when wintered, only produce about one-third as much seed as loose and smaller heads, and thus the extra value of the strain is at once lost. The stock of these three new strains was secured from, and the seed grown for us by, old, experienced cabbage growers on Long Island, at more than three times the cost if raised by regular cabbage-seed growers, and hence retains the valuable qualities which cause the cabbage to sell for double price in the markets.

—SPECIAL OFFER.—

To induce all to plant these three kinds, we will send one packet of each for 25c., or 1 oz. of each for \$1.00, prepaid.

No. 207.—Improved Large Early Royal. This grows on short stem, with few outer leaves; very uniform and maturing evenly; all coming in market when prices are high, as it comes directly after the first early conical heading kinds, as N. Y. Improved Earliest Market and Improved Early Jersey Wakefield. It is without doubt the best large early-heading variety in cultivation.

No. 207.—Improved Large Early Royal Cabbage. Packet, 15c.; oz., 50c.; lb., \$6.00.

No. 211.—N. Y. Improved All Head. This is intermediate in maturing, coming as a second large early if planted early, and also useful for a main crop if planted late, as 99 out of every 100 plants produce extra large, solid and even heads, so remarkably hard as to be worm proof. This should be planted for main crop when the seasons are not long enough to mature the later kinds, as Large Late Flat Dutch, etc.

No. 215.—N. Y. Heavy Weight Prize. This is a grand large, late, heavy-heading strain, that we sent out in last season's World's Fair Prize, and has given remarkable satisfaction. It is the finest sort to grow for exhibition purposes, and for main crop for those who have good cabbage soils and long seasons. When grown to perfection it always takes the prize.

Tomato.—Ger. *Liebesapfel*.

Our Tomato Seed is saved from selected specimens and by old and experienced growers. It is the best—none better. It should not be confounded with mixed canning-factory seed. Cheaper seed can be furnished if wanted, but not under our brand.

THE FAMILY PRIDE, * THE EARLIEST = = = = = = = AND BEST POTATO.

No farm or garden crop is so much improved in yield and earliness by the change of seed as the potato, especially if the seed selected comes from the far north, and possesses new blood. The necessity of new blood in potatoes is caused by the fact that it is only a question of time when the best sorts run out and become unprofitable to grow. The old and popular Early Rose in its day was the finest potato ever grown, but now has run out, to a great extent, either becoming a shy cropper or inferior in its original cooking qualities.

In **THE FAMILY PRIDE** we offer an entirely new and distinct variety, originating from a seed-ball of the original *Early Rose*, and hence possesses the requisite new blood, besides coming from the far north. It excels the qualities of its parent, when that was in its prime, by being **earlier** and a **heavier cropper**, and is equal in fine **cooking qualities**, and differs from it in form, being more round and slightly flattened, with but few eyes, and they lie even with the surface. In habit it is of robust growth and strong vine, growing compact in the hills, and matures ahead of all others. It was the first in this market the past season, and on good land produces from 300 to 450 bushels per acre; the entire stock was in the hands of a few northern growers, who had a monopoly of it. The stock we offer is all grown in the far north, and by the originators. It is better adapted to grow on Long Island for first early crop than any strain or sort offered. We guarantee it will give more satisfaction than any new variety in potatoes offered at double the price. We have put the prices at popular rates, so as to be within the reach of all. No better investment can be made than to use this variety for seed, as the increased yield will more than four times pay for the additional cost over that of home-grown seed.

PRODUCT
OF THREE VINES

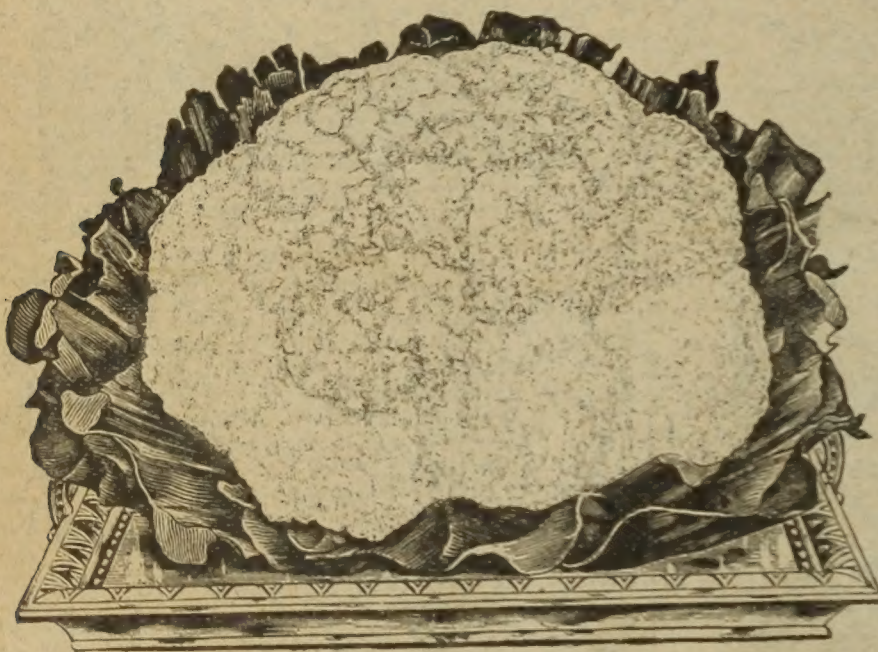

Prices, prepaid, 1 lb., 30c.; 3 lbs., 65c.; not prepaid, per peck, 70c.; per bush., \$2.00; per bbl., \$5.00. Special prices on larger lots.

Columbian Novelty

Collection for 1893.

\$3.00 WORTH OF SEED FOR \$1.00.

290.—Improved White Cap Cauliflower, packet, 15c.; oz., \$3.00.

It is desirable to always test New and Improved Novelties before planting largely of them, and for this reason we have arranged the most complete Collection of the latest novelties, offered by the various seedsmen, at greatly reduced prices. As we grew our stock direct from each introducer's seed stock, they can all be relied upon as being genuine. To enable us to offer them at this reduced price, we have put this collection up in large numbers, in the dull season, hence we can not make any change in the contents or the kinds. Correspondence on this point is unnecessary.

To order one packet each from the introducers would require half a dozen letters and remittances, and the lot would cost a little over \$3.00, while one letter and one remittance to us secures the entire lot of 25 large packets, equally as good and as large as that from the introducers, for \$1.00.

The **COLUMBIAN NOVELTY COLLECTION** contains one large packet each of **Beans, Improved Bush Lima**, said by many to be far superior to Henderson's Bush Lima. **Thorburn's Refugee Wax Bean**. **Henderson's Succession** and **Henderson's Autumn King Cabbage**. **New French Bellot Carrot**, fine. **Improved White Cap Cauliflower**, the best sort extant. **New Giant Pascal Celery**, very large and tender. **Thorburn's Everbearing Cucumber**, fine for pickles and an immense bearer. **Burgee's New Giant Pera Cucumber**. **Improved Extra Early White Sugar Corn**, the earliest white sweet corn in cultivation. **Country Gentleman Sweet Corn**. **New Grand Rapids Lettuce**, very early and fine for forcing. **New Denver Market Lettuce**, extra large for main market crop. **New Winter Musk Melon**, **Santa Claus**, a grand novelty. **New Dixie Water Melon**, large, and long keeper. **New Van Cluse Water Melon**, superb quality, red seeded. **New Prize-taker Onion**, the largest variety grown—very mild and sweet. **New Mam. Silver King Onion**. **New Profusion Pea**, abundant cropper, very sweet and good. **New Herion Pea**, extra fine green wrinkled marrow of fine flavor. **New Fancy Red and Yellow Wrinkled Pepper**, mixed, very ornamental as well as useful. **New Round Scarlet China Red Radish**, good for summer use. **New Mansfield Tree Tomato**, grows so erect that chickens cannot reach the fruit. **New Veroza Tomato**, extra large and fine. **Thorburn's Long-keeping Tomato**, claimed by *Rural* to be a great improvement over all sorts. No one can make a mistake to order this collection; it is the best reason by any house. Remember, if 50c. more is ordered with this collection, making total one time, the World's Fair Prize Collection is added free, see first inside cover page.
